1

Van Height
Measure from the ground at the centre of the wheel(s), to the bottom of the van sailtrack.

2

Wall Height
The height of the legs when extended. Should be close to 2100mm.

3

Angle
The width of the awning from where the material attaches to the van, to the empty groove in the awning barrel.

4

Vinyl Length
The length of the vinyl measured along the barrel.

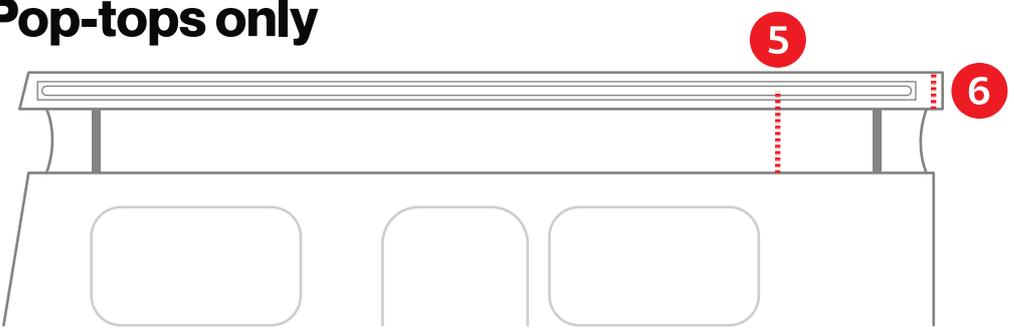

5

Pop-top Infill
Measure from the top of the van to the middle of the sailtrack on the pop-top roof.

* Ensure the empty groove in the awning barrel is facing 9 o'clock towards the van.

2 Ensure the legs are vertical.

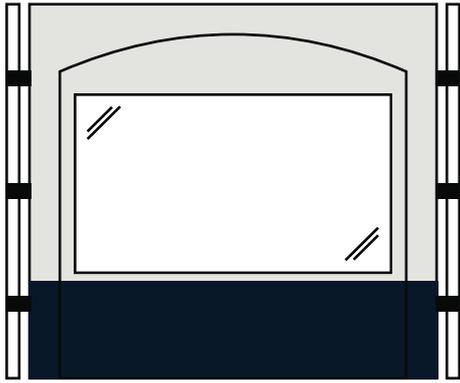

Pop-tops only

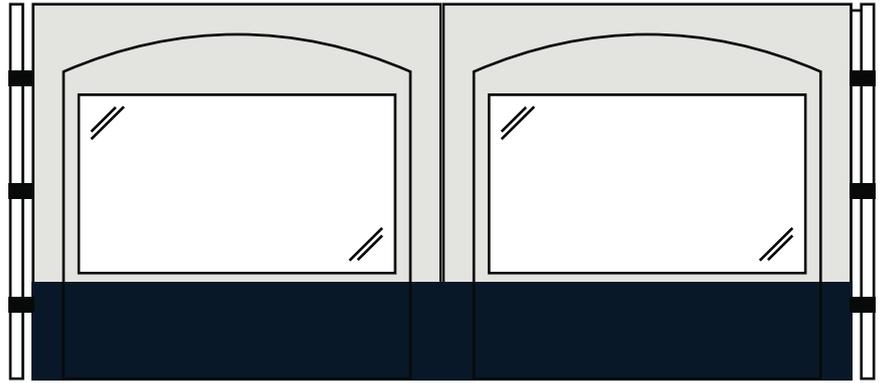

6

Pop-top Roof
Height of the pop-top roof.

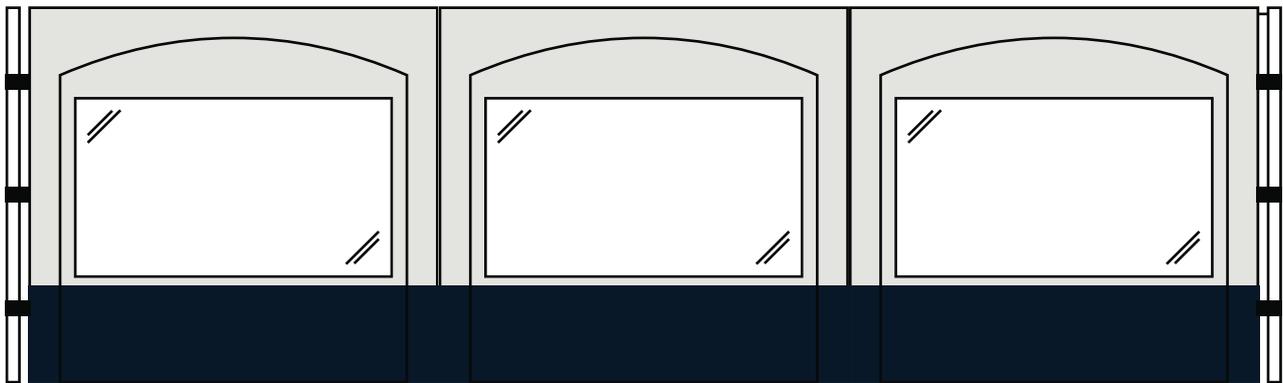

Layout 1
Awning vinyl length up to 4m

Layout 2
Awning vinyl length 4m to 6m

Layout 3
Awning vinyl length over 6m
