

54L Caravan & RV Water Tank

BR Plastics design and manufacture specialised plastics for Australian and international markets. With over 50 years experience in plastic rotational moulding, our extensive product portfolio includes storage bins and drums, spill containment, pre-school activity equipment, equestrian equipment, automotive tidy trays, canoes, marine buoys, water tanks and a range of continuous (piano) hinges.

The BR Plastics 54L tank is blow moulded from food contact approved High Molecular Weight High Density Polyethylene. This makes the tank a super tough performer.

The tank is moulded with three integral 20mm (3/4 BSP) threaded closures that can accept a wide variety of standard fixtures and fittings.
